

Heuristic Evaluation

1 Introduction

The name of the application being evaluated followed by a brief description of the application.

2 Method

A list and description of the Heuristics to be considered in the evaluation.

You can use the list discussed in lecture and add/subtract relevant/irrelevant heuristics to this list.

Include a key for your severity rating scale, again you can use Nielsen's described in lecture.

3 Findings

A list of the violations identified in the following format:

3.1 [H-4 Consistency] [Severity 3]

- Description of the problem including how it violates the heuristic
- Reasoning behind the severity rating
- Suggested fix

4 Summary

A summary of the findings of your evaluation....
